**Tropical Storm ADA (NOKAEN)**
Issued at 11:00 PM, 15 January 2026
Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

**TRACK AND INTENSITY OUTLOOK**

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- ADA will move generally northwestward today through Saturday (17 January) before turning slowly north northwestward to north northeastward by Sunday (18 January). Beginning Tuesday (20 January), ADA is forecast to move southeastward while moving over the sea east of Bicol Region. On the forecast track, the center of ADA may pass close to Eastern Samar and Northern Samar by Saturday and Catanduanes by Sunday. A further westward shift in the forecast track may result in a possible landfall over Eastern Visayas and Bicol Region. The track forecast may change in succeeding bulletins, especially for the Saturday or Sunday period.
- ADA is forecast to gradually intensify over the next 48 hours before it weakens as it turns northeastward over the sea east of Catanduanes.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
